

NAMAH[®]
Scale New Heights

UIAA
Global Safety Partner

www.namahropes.com

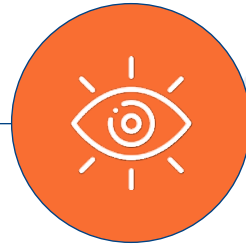

Namah builds on over a century of textile and manufacturing expertise, rooted in the JP Group since 1898. As a vertically integrated manufacturer, we design ropes from fibre to finish for rope access, rescue, climbing, and work at height. A UIAA Global Safety Partner and IRATA member, Namah delivers products meeting global safety standards, trusted by professionals worldwide.

Engineered by experience. Trusted in vertical environments.

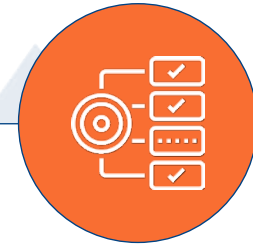

MISSION

To craft innovative, reliable, and eco-conscious climbing and safety gear that empowers people to explore boldly, climb confidently, and trust every step of their journey.

VISION

To be the world's most trusted climbing and safety brand, inspiring people to scale new heights.

OBJECTIVE

To design, manufacture, and continuously improve certified rope systems through end-to-end control, application-driven engineering, and global compliance.

What we Stand for

1 Safety as Responsibility

As a UIAA Global Safety Partner, NAMAH helps advance and define global climbing and vertical safety standards.

2 Professional Credibility at Height

As an IRATA member, NAMAH engineers equipment relied upon by rope access and work-at-height professionals worldwide.

3 Meaningful Innovation

Registered technologies like AquaBloc and KoreLoc, engineered for harsh, real-world environments.

4 Innovation and Performance

Pushed limits by manufacturing Genius 8.4 mm, the world's thinnest, lightest Triple rated dynamic climbing rope.

5 One Brand. All Vertical Worlds

Globally certified to UIAA, EN, ISO standards, delivering trusted performance across all vertical applications.

How *we* Deliver it

End to End Manufacturing Excellence

- Vertically integrated manufacturing with complete in-house control, from yarn extrusion to finished products- ensuring consistency, traceability, and uncompromised quality.

People Behind the Performance

- Dedicated in-house teams trained for safety-critical manufacturing, ensuring consistency, accountability, and excellence.
- 50,000+ test cycles annually across strength, elongation, abrasion, and durability

Capacity for Global Scale

- > 3 million metres of rope/year manufacturing capacity
- > 500,000 units of hardware/gear produced annually

Testing & Validation

- Tested in -30°C to +45°C climate extremes

Sustainability & Responsibility

Sustainability at **NAMAHA** means Community investment, environmental responsibility, durable gear.

2.5% of profits
reinvested in
local welfare

Long-term support
for education
and healthcare

Solar-powered
operations

Rope recycling
initiatives

Responsible materials
& low-impact
manufacturing

Water-efficient,
green processes

100+ tonnes CO₂
avoided annually

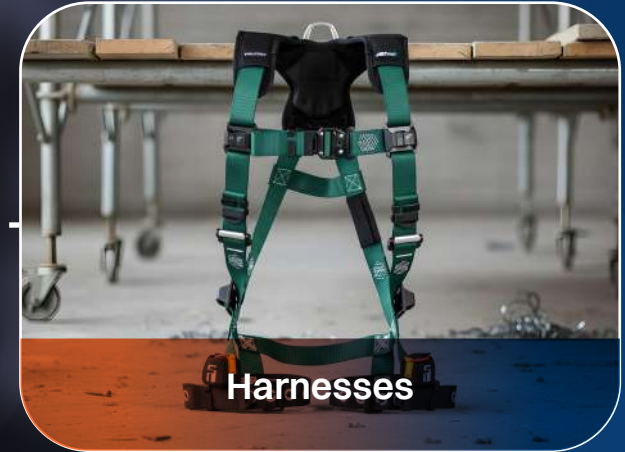

Our Products

Dynamic Ropes

Semi-static Ropes

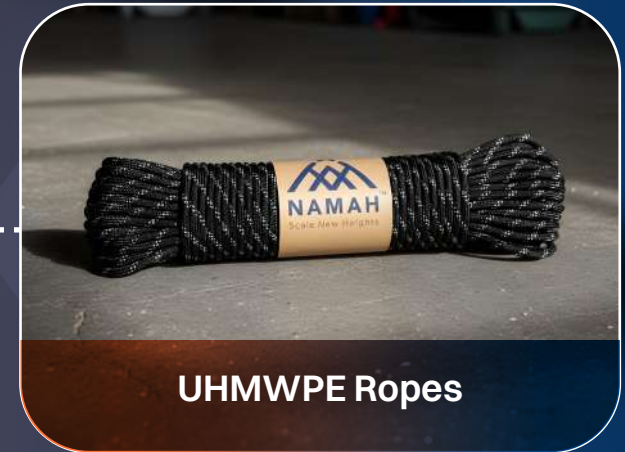

Harnesses

Slings

Double Braided Ropes

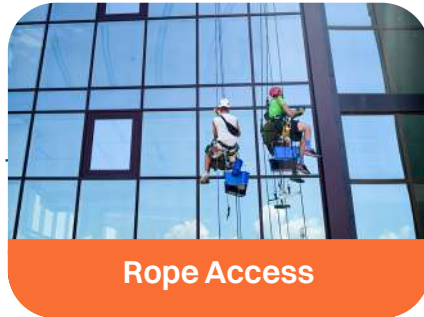

UHMWPE Ropes

Industries *we Cater to*

Mountaineering

Rope Access

Work at Height

Climbing Gyms

Arborist & Tree Care

Boating and Yachting

Mooring

Rescue Management

Caving

Canyoning

Ice Climbing

Rock Climbing

Why MOUNTAINEERING INSTITUTES & CLUBS choose *Namah*

Designed for Real Climbing Environments

- Developed with input from professional climbers and instructors.
- Balanced rope handling for both indoor training walls and alpine terrain.
- Reliable performance across varied weather and altitude conditions.

Built for Intensive Training Cycles

- High abrasion resistance for repeated belays and top-rope sessions.
- Long service life even under heavy institutional usage.
- Maintains smooth handling after extensive training cycles.

Training environments are demanding. Will the gear last?

- Fully UIAA and CE certified, meeting international climbing safety benchmarks.
- Strict quality control and testing at every stage of production.
- Predictable dynamic performance ensuring safer training environments

Teaching mountains takes more than strength.
It takes trust through repetition and responsibility.

What's in it for *You*

NAMA H equips institutions that teach mountains with discipline, care, and responsibility.

BETTER VALUE FOR TRAINING BUDGETS

- Competitive pricing compared to global brands without compromising safety.
- Lower replacement frequency due to high durability.
- Enables institutes to equip more climbers within the same budget.

LONGER PRODUCT LIFECYCLE

- High abrasion resistance ideal for repeated training use.
- Maintains performance even after extensive belaying and rappelling cycles.
- Reduces frequent rope replacement costs.

RELIABLE SUPPLY & FASTER AVAILABILITY

- Strong manufacturing capacity ensuring consistent supply.
- Ability to support large institutional orders and training programs.
- Reduced dependency on long international supply chains.

PARTNERSHIP BEYOND JUST PRODUCTS

- Technical support and product guidance for instructors.
- Opportunity for long-term institutional partnerships and collaborations.
- Brand association with a growing global climbing and safety brand.

Proven in the Climb

On the spectacular granite big walls of Cochamó Valley, Chile, this rope performed efficiently. It showed great resistance to friction and abrasion, and was practical for rappelling. I found it to be a strong, malleable rope that is easy to use with safety systems.

FERNANDO GONZALEZ RUBIO
Professional Climber, Colombia

The rope in mountaineering represents a link between a climber and his partner, and also a link between life and death. Namah ropes have lived up to the highest standards needed for cutting edge ascents by delivering a lightweight, robust yet flexible rope.

JEROME SULLIVAN
French-American Mountaineer

As a mountain guide and elite rock climber I use Namah ropes because I can trust them on a daily basis. Whether of a ridge with my clients or on a steep rock face, their variety of ropes and the quality they live up to make them a perfect choice.

JOHANN MARCOZ
IFMGA Mountain Guide, Elite Rock Climber
